Installation Instructions

The program is stored as runnable jars, with the names "vpn-Window.jar" and "vpn-OSX.jar", in the root directory in this Github repository. Below are the installation instructions.

For Windows

Simply click on the runnable jar "vpn-Windows.jar"

For OSX

1. Open terminal
2. Navigate to the directory containing the runnable jar "vpn-OSX.jar"
3. Enter "java –jar –XstartOnFirstThread vpn-OSX.jar" to run

Note: If by any chance the above instructions are unsuccessful. The program can be executed by importing the project into Eclipse and run as Java Application from there.

Sorry for any inconveniences.
